

Fluoride Links

There is a great deal of information and many websites dealing with fluoride and water fluoridation. Listed here are five very strong sites that present the responsible, scientifically supported point of view opposing the use of water fluoridation. They present scientific data, quotes, abstracts, and legislative and legal news.

**The History of Fluorine, Fluoride
and Fluoridation**

www.slweb.net

Second Look is a national non-profit initiative (a [Tides Center](#) project) that evolved from grassroots frustration with public policies that are so controversial that useful, factual information becomes almost impossible for the public and even professionals to sort out.

**"...public health officials have often suppressed scientific doubts in order to reassure the public."
– Oakland Tribune**

**"For decades we have believed that fluoride in small doses has no adverse effects on health. But more and more scientists are now questioning the benefits of fluoride, even in small amounts."
– UNICEF**

**"It is interesting that those advocating mandatory fluoridation, who claimed to have all the scientific data on their side, were unwilling to debate that evidence."
– New Hampshire Rep. Richardson**
